👤 Suyash Sinha

Profile

Pre-Final year B.Tech ECE student with a strong foundation in electronics and programming, developing expertise in frontend, backend, and AI/ML. Interested in full-stack development and intelligent applications to pursue a career in full-stack development and data-driven applications and to solve real-world problems.

Education

12th-CBSE, Guru kripa Academy 03/2021
82% in 12th Boards Bhagalpur, Bihar

10th - ICSE, St. teresa's School 03/2019
85% in 10th Boards Bhagalpur, Bihar

Bachelors of Technology, Birla Institute of Technology, Mesra 09/2023 – Present
Pursuing B.Tech ☑ in Electronics and Communication Engineering which **Current**
Sgpa-8.48 and Aggregate Cgpa-7.8

Skills

Web Development

Proficient in HTML, CSS, JavaScript, React.js, and Node.js for building responsive and dynamic applications.

Programming Language

Skilled in Java, C, C++, and Python with strong problem-solving through Data Structures & Algorithms.

Frameworks & Tools

Hands-on with Java GUI and Spring Boot for backend development, currently learning NumPy for machine learning.

Databases

Experience with MongoDB and MySQL for efficient data storage and management.

Hardware and Embedded System

Worked on Arduino programming and hardware integration projects.

Additional

Enthusiastic learner, combining knowledge of software and electronics to build practical solutions.

Projects

Currency Converter Website, 07/2025
Web Application | JavaScript, HTML, CSS, API Integration ☑

- Developed a responsive web application to convert currencies using real-time exchange rates from a free API.
- Implemented features like user input validation, dynamic conversion results, and multiple currency support.
- Strengthened understanding of API integration, JavaScript DOM manipulation, and responsive web design.

Brick Breaker Game, <i>Java Game Development GUI (JFrame, JPanel, Java Graphics)</i> • Designed and developed a classic brick breaker arcade game using Java GUI frameworks (JFrame, JPanel) and Java Graphics Kit. • Implemented game mechanics such as paddle movement, ball dynamics, collision detection, scoring system, and level progression. • Applied object-oriented programming principles and event-driven programming for smooth gameplay.	06/2025
Amazon and Netflix UI clone, <i>UI Clone React.js, HTML, CSS, JavaScript</i> • Built a responsive e-commerce frontend interface replicating Amazon's design using React.js, HTML, CSS, and JavaScript. • Implemented product listing, navigation bar, cart UI, and login page to practice real-world UI/UX concepts. • Strengthened skills in component-based design, responsive layouts, and frontend development.	06/2025
Voice Controlled Home Automation System, <i>Arduino Embedded Arduino IDE Bluetooth Module</i> • Designed a home automation System controlled by voice command • Automated appliances like LED enabling hand-free control through voice module	05/2025
Obstacle Detection Radar System, <i>Arduino Ultrasonic Sensor Servo motor Arduino IDE</i> • Implemented a real-time Scanning mechanism and visual output to detect object distance and angle.	05/2025
