👤 PROFILE

Pre-Final year B.Tech ECE student with a strong foundation in electronics and programming, developing expertise in frontend, backend, and AI/ML. Interested in full-stack development and intelligent applications to pursue a career in full-stack development and data-driven applications and to solve real-world problems.

🎓 EDUCATION

Bachelors of Technology , <i>Birla Institute of Technology, Mesra</i> Pursuing B.Tech in Electronics and Communication Engineering which Current Sgpa-8.48 and Aggregate Cgpa-7.8	09/2023 – Present
12th-CBSE , <i>Guru kripa Academy</i> 82% in 12th Boards	03/2021 Bhagalpur, Bihar
10th - ICSE , <i>St. teresa's School</i> 85% in 10th Boards	03/2019 Bhagalpur, Bihar

🧠 SKILLS

Web Development Proficient in HTML, CSS, JavaScript, React.js, and Node.js for building responsive and dynamic applications.	Databases Experience with MongoDB and MySQL for efficient data storage and management.
Programming Language Skilled in Java, C,C++, and Python with strong problem-solving through Data Structures & Algorithms.	Hardware and Embedded System Worked on Arduino programming and hardware integration projects.
Frameworks & Tools Hands-on with Java GUI and Spring Boot for backend development, currently learning NumPy for machine learning.	Additional Enthusiastic learner, combining knowledge of software and electronics to build practical solutions.

📁 PROJECTS

Smart-Health-Surveillance , <i>Smart Community Health Monitoring, SIH 2025</i> 	09/2025 – Present
• A website for data collection and community health reporting. • AI-based outbreak prediction engine using health and environmental data. • Integration with low-cost water quality sensors or manual test kits. • Alert system for health authorities and local leaders. • Educational modules for hygiene awareness and disease prevention. • Offline functionality and support for tribal languages.	
Currency Converter Website , <i>Web Application JavaScript, HTML, CSS, API Integration</i> 	07/2025
• Developed a responsive web application to convert currencies using real-time exchange rates from a free API. • Implemented features like user input validation and multiple currency support. • Strengthened understanding of API integration, JavaScript DOM manipulation, and responsive web design.	
Brick Breaker Game , <i>Java Game Development GUI (JFrame, JPanel, Java Graphics)</i>	06/2025
• Designed and developed a classic brick breaker arcade game using Java GUI frameworks (JFrame, JPanel) and Java Graphics Kit. • Implemented game mechanics such as paddle movement, ball dynamics, collision detection, scoring system, and level progression. • Applied object-oriented programming principles and event-driven programming for smooth gameplay.	
Amazon and Netflix UI clone , <i>UI Clone React.js, HTML, CSS, JavaScript</i> 	06/2025
• Built a responsive e-commerce frontend interface replicating Amazon's design using React.js, HTML, CSS, and JavaScript. • Implemented product listing, navigation bar, cart UI, and login page to practice real-world UI/UX concepts. • Strengthened skills in component-based design, responsive layouts, and frontend development.	
Voice Controlled Home Automation System and Obstacle Detection Radar System , <i>Arduino Embedded Arduino IDE Bluetooth Module Ultrasonic Sensor Servo motor</i>	05/2025
• Designed a home automation System controlled by voice command • Automated appliances like LED enabling hand-free control through voice module • Implemented a real-time Scanning mechanism and visual output to detect object distance and angle.	

LANGUAGES

ENGLISH — Good communication skills, able to read and write technical documents

HINDI — Native/Mother Tongue
